

— **comfortpro**

[From approximately 9 months to approximately 12 years] [9 kg to 36 kg]

comfortpro

Why is kiddy comfort pro better than all other child car seats in this age group?

The new kiddy comfort pro offers a compelling argument by its innovative adjustment concept, which enables height and width expansion with only one hand movement.

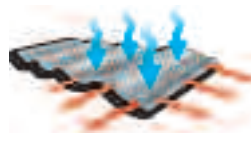

That way the kiddy comfort pro grows with your child up to his twelfth year and continues to provide sufficient room as well as an added feeling of well-being.

The protective impact shield (for use up to 18 kg) and the above-average lateral impact protection of the kiddy comfort pro completes the safety concept and transforms the seat into the perfect bodyguard for your child.

Comfort and contentment

Your child's safety is of utmost importance to us. However, we also do not hold back on comfort. In the course of our development efforts we incorporate both elements and search for the perfect solution that brings safety and comfort in harmony. The result is

something to be proud of. For that reason the covers of the new kiddy comfort pro are made of the highly breathable Thermotex fabric in the places where your child perspires the quickest on hot summer days. This unique airing system's great advantage is that it transfers the heat to the outside. Air circulation is optimised and a pleasant seating environment is created for every season.

Comfortable handling

A new and unique adjustment mechanism enables simultaneous height and width adjustment with only one hand movement. An especially easy installation (less than 1 minute) reduces the danger of incorrect installation to a minimum, which means less stress. Very easy-to-clean covers, washable at 30° - dry dirt can simply be wiped off with a damp cloth.

Optimum safety

The kiddy comfort pro is equipped with the extreme shock-absorbing insulation materials Honey Comb and EPP (expanding polypropylene) and thereby absorbs more energy than other child car seats. That provides optimal lateral impact protection if the worst comes to the worst. The elevated seating ramp in the thigh area not only offers more comfort, but also prevents the child from sliding through under the belt (anti-submarine effect) in case of an accident.

Why can a kiddy Original impact shields save your child's life?

Impact shields are becoming increasingly popular and are already very fashionable. With its Original impact shields, kiddy many years ago took the lead in this technology and received numerous awards for the high degree of safety and the pleasant seating comfort of the seats. Naturally we have improved on ourselves over the years. Therefore you can trust the tried and tested Original. Extensive information available at www.kiddy.de

Extreme shock-absorbing insulation materials "Honey Comb" and EPP

assures powerful lateral impact protection

Very comfortable lateral head rests

for good support during sleeping; the head cannot roll to the side any more – nothing can prevent sweet dreams!

Protective impact shield

that not only prevents cervical vertebrae injuries, but also contributes greatly to the child's comfort

Adjustable lying position

makes it easier to fall asleep (usable until 18 kg)

Robust and enhanced thigh support

(anti-submarine effect) – can be pulled out during longer car trips, for an especially comfortable leg position

Testwinner of its class! (june 2008)

Breathable Thermotex fabric

in the places where your child perspires the quickest – assures the perfect seating environment through ideal moisture transference

Safe and secure shoulder supports

prevent lateral toppling over of the upper body

Integrated belt guide

assures the perfect growth-adjusting development of the belt

Unique adjustment mechanism

that enables simultaneous height and width adjustment with only one hand movement – maximum comfort for the parents!

Very easy-to-clean cover, removable and washable (at 30°)

Perfect comfort by adjustable seat elevation

With the fold-away comfort pro seat cushion, you always have control over the perfect seating position – fully adjustable according to the age and size of your child.

Adjustable lying position, ideal during long car trips! (usable until 18 kg)

Retractable leg support, for even more comfort
