

The whiz kids among the child car seats

With the two innovations of kiddy, a new era begins at child car seats:

The **guardianpro** (From approximately 9 months to approximately 12 years / 9 kg to 36 kg) and the **cruiserpro** (From approximately 4 years to approximately 12 years / 15 kg to 36 kg) are offering even more safety and impress with an exciting, visionary design.

Convenient side-header and shoulder rest

Original kiddy impact shield

kiddy shock absorber (KSA)

guardianpro

The **guardianpro** and the **cruiserpro** are disposing of everything that is expected from a modern child car safety seat: comfortable seating thanks to comfortable padding, convenient side-header rests and shoulder rests as well as an adjustable reclining position with a variable leg-extension. This userfriendly handling with one-hand adjustment and a simple belt guide to ease significantly everyday use. Apart from these functions, the new child car seats are complemented by outstanding safety features, because in addition to the proven high-tech materials and the original impact shield, the newly developed kiddy shock absorber (KSA) is being used which can significantly reduce the impact force the child is exposed to in case of an accident.
