

infinitypro

Why is the infinity pro better than any other child car seat in its class?

The new kiddy infinity pro is the only child seat in its age group that uses an integrated 'impact shield'—a feature that can save lives. Like all kiddy models, the infinity pro is especially easy to carry and is quickly installed in your vehicle. In addition, the kiddy infinity pro has received the highest possible rating from the German Automobile Club and Consumer Product Safety Agency as "Best in class" (May 2007)!

Exceptional comfort

Although your child's safety is our highest priority, your child's comfort is also very important to us. Our product development experts take both aspects into consideration to search for the perfect solution. The results are obvious: the new kiddy infinity pro's covers are especially soft and plush—guaranteed snugness!

This car seat is designed to give your child an unobstructed view of the world around him. The ergonomically correct headrest supports your child's head perfectly when she is sleeping, preventing rolling to the side during travel. But we haven't forgotten the need for comfort for parents as well. The kiddy infinity pro is light enough for you to transfer from one vehicle to another with ease.

Convenient operation

Simple installation not only reduces the risk of error but also takes the stress out of getting ready to go out! The new kiddy infinity pro can be installed in your car in just a few quick steps. Even adjusting the height of the headrest is simple and fast. And when you can't restrain those sticky chocolate-covered fingers anymore, the covers are conveniently removable and machine washable in warm water. Easy-care materials let you simply wipe off already dried grime with a wet cloth.

Uncompromising safety

Since the greatest number of injuries to children in vehicles result from side impact, the new kiddy infinity pro is equipped with extremely shock-absorbing "honey comb" padding in the sensitive head and shoulder areas. "honey comb" technology is based on the structural integrity of beehives and diffuses the force of side impact for longer and more evenly. This feature has earned praise from the German Automobile Club and Consumer Product Safety Agency, who have given the kiddy infinity pro their best ratings.

How a kiddy Original impact shield can save your child's life?

Impact shields are becoming increasingly popular. Kiddy took the lead in technology many years ago developing its Original impact shield, and received numerous awards for the high degree of safety and the pleasant seating comfort of the seats. Our already high standards improve year on year. Therefore you can trust the tried and tested Original. More information available at www.kiddy.de

Comfortable side headrests

for proper support while sleeping; the head doesn't roll from side to side

Extremely impact-absorbent "honey comb" padding

in the sensitive sides of the head and shoulder areas

Protective body shield

greatly reduces the risk of severe neck injury compared to typical five-point harness systems

Removable insert cushions

adjustable for your child's size

Integrated height adjustment

for a safe and suitable seating position at all times

Generous shoulder support

prevents side movement of the upper body

Removable and washable covers

30 °C

Adjustable recline position

Increased leg area padding

to prevent slip-through

Adjustable seat height means optimum comfort

Raising and lowering the infinity seat height gives you complete control over the perfect seat position suitable for the age and size of your child.

Perfect temperature: seat warming and cooling

With our optional "kiddy climate" seat liner, your child can enjoy all the advantages of either heated seating in winter or cooling cushions in summer... an indispensable luxury.
